DETAILED ACTION

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Drawings

2. The drawings are objected. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

In Figures 1 and 2, the block elements should be labeled with its description.

Specification

3. The abstract of the disclosure is objected. Correction is required. See MPEP § 608.01(b).

In line 2, the phrase "rotation rate sensor with a vibrational gyroscope" should be deleted. Furthermore, in line 14, the phrase "Figure 2" should be deleted.

Claim Objections

4. Claims 8 and 11 are objected to because of the following informalities. Appropriate correction is required.

In claim 8, line 4, the phrase "said lowpass filter control circuit" should be changed to – said lowpass filter control input – to provide proper antecedent basis.

In claim 11, line 3, the phrase – threshold value – should be inserted before the word "circuit" to provide proper antecedent basis.

Allowable Subject Matter

5. Claims 7-12 are allowable over the prior art of record.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

The references cited are related to a gyroscope having a bandpass filter and a lowpass filter in its circuitry.

Art Unit: 2856

7. This application is in condition for allowance except for the following formal matters as set forth above.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
